

JOIN THE RALLY!

The National Disability Insurance Scheme (NDIS) promises a brighter future for thousands of Australians. But that promise is falling short. Complicated planning processes, lots of red tape and inadequate funding in participants plans are causing problems. Providers and participants are calling on both major political parties to deliver on the promise.

MAKE IT WORK

**NDIS
2019**

The problem

The way the NDIS is being delivered means it's not yet working for everyone.

Complex processes and red tape are creating roadblocks.

Too many people aren't getting the support they need.

Government needs to provide secure, supported employment.

If we don't get the NDIS on track now, we risk winding back the clock to the way disability support worked decades ago.

No one wants that.

What we're campaigning for

Disability service providers across Australia are calling for:

1. Secure, supportive employment

2. Better NDIS planning

3. Less red tape

4. Real sector safeguards

With these four steps we can deliver the NDIS promise.

EVERYONE WELCOME!
